

## FUNCTIONAL DOCUMENT FRONTEND – STEP 2

The current document lists the different screens with their functionalities. It will be assessed how the final solution has been obtained, as well as the different technologies used.

**NOTE:** The implementation of the provided design should be adapted to the different screen resolutions.

### **Seidor- Homepage.png**

- There are three carousels to be implemented. Implement one of them without using plugins, that is, using JQuery or Vanilla JS only. Implement another of the carousels using a plugin.
- Each slide of the “Descubre nuestras colecciones” has composed of two elements: 1 image and a group of 4 small images.
- It's important to implement interactions with the buttons, links, etc.
- Implement a small footer functionality to be able to select a country and a language with the corresponding selects.
- Implement “See more +” and “See less -” functionality in the SEIDOR TOP component. When you do click ok “See more”, you should show more text and the current button will change to the “See less”.

### **Seidor – HomepageMenu.png**

- Implement dropdown menu

### **Seidor – HomepageBolsa.png**

Implement pop-up about the shopping cart. It should be displayed when you click on the bag icon.
